ABOUT ME

Hi, I'm Ian and I'm a web developer with a particular interest in frontend, maps and 3D. I built my first website in 1999 and have kept up to date with the latest technologies ever since, having developed industry standard applications in my previous roles using react, three.js, mapbox and cesium.

I have a strong background in 3D and have worked on a variety of projects including educational games, VR and AR apps and simulations. I have a keen eye for detail and enjoy working with clients to bring their ideas to life.

I am a highly motivated, sociable, fast working and adaptable individual. I prefer office based work over remote when possible. As a more senior developer I am looking to mentor and help others and always like to contribute my ideas.

In my personal life, I like to keep active with cycling and running. I once captained a local winning Dodgeball team! I am currently training for the great north run in aid of Prostate Cancer. I love to watch films, Formula 1 and football (I will tell you who I support if I get the job!), I like to keep up to date with the latest tech and astronomy on youtube and enjoy reading influential books such as 'The Mom Test' and 'Million Dollar Weekend'. Of course I also enjoy spending time with my family and friends and spending too much money on Lego!

EMPLOYMENT HISTORY

Insight UK – Creative Developer	December 2025 – March
(Contract)	2026

- Built a high fidelity digital dashboard presenting complex business data as a rich, compelling visual narrative.
- Created futuristic, movie quality visuals using Unreal Engine and Three.js.
- Developed AI driven storytelling to guide viewers through complex datasets.
- Modelled and sourced the 3D and 2D graphics for the project.
- Delivered to a fixed deadline for a high stakes client presentation.

Freelance – 3D and Code	2011 – 2016 & 2024 – Present
-------------------------	------------------------------

- Created 'Zippy Town 3D', a cartoon city live wallpaper for Android, with a full Three.js showcase site at zippy.town using

EDUCATION

2004	BA Hons in Creative Visualisation University of Teesside
1999	A Levels in Maths, Physics and Technology, St John Fisher Sixth Form
1997	GCSE's including Science, Technology and Art, St John Fisher High School

- DRACO compressed meshes, LOD and post processing.
- Built python based Blender addons for art asset exporting and importing
- Helped develop 3d interior design editor in three.js, including tiling editor
- Implemented webrtc feed from browser to Blender in realtime, for high quality realtime rendering
- Produced the photorealistic hero render sequence for the M-Sport Ford Raptor T1+ Dakar Rally site, from supplied CAD data through Unreal Engine materials and lighting. The site won Awwwards Site of the Day.
- Built a VR driving simulator for highlighting the dangers of Alcohol and driving.
- Various AR based app, including displaying interactive information on a real world brain model.
- Worked on Sixty5 app for helping farmers spray fields using GPS data.
- Worked on Combat Air Patrol 2 flight simulator. Modelling cockpits, Aircraft and various supporting assets.
- Created 'Ocean Depths' app for an exhibition. A first person journey into the depths of the ocean in a submarine.
- Developed my skills in client management and personal organisation.
- Built detailed model of Queens University building in Belfast.

3DEO – Lead Visual Engineer

2016 – 2024

- Built a browser based realtime 3D terrain visualizer in typescript for displaying and analysing Bathymetry (under water) elevation data.
- Co Developed the customer portal in react and AWS for managing and viewing complex customer geospatial data.
- Improved volume calculation speeds from 30 seconds to 0.1 seconds, via gpu calculations.
- Designed and built terrain colouring method that allowed customers to analyse their large datasets in realtime.
- Worked with Harwich Port to build simple colour system for guiding harbour pilots through port.
- Worked with team to convert huge datasets (gigabytes) into a format that could be streamed to the browser in seconds.
- Developed method to show changes in elevation data over time, again in realtime.
- Created Server app for converting raw cctv feed to browser compatible video stream.
- Created an AR mobile app to show air quality at various real world locations.
- Built a realtime 3D flythrough of the Forth estuary, for use at the COP26 summit.
- Worked with AWS EC2, S3 and other backend infrastructure.

Caspian Learning – Artist / Developer

2005 – 2015

- Building educational games for schools, military and professional industries.

INTERESTS AND ACHIEVEMENTS

- Created and released Xbox Live Indie Game, Avatar Euro Penalty Shootout with a friend , which achieved number 1 sports game and number 8 overall chart position in the UK
- I regularly attend events and networking meetings related to gaming, IT and the creative sector.
- Always keen to learn and keep my knowledge and keep up to date by attending industry related conferences such as unity.com/events/unite and www.middlesbroughfe.co.uk
- Co Developed a Kinect training simulation for NATO and demonstrated it in Rome at the annual ITEC conference www.itec.co.uk
- Achieved a top 60,000 website ranking on alexa with www.g-unleashed.com
- I love to keep fit by cycling and walking
- Avid Follower of TEDTalks and Tech blogs such as Geek.com, and TheVerge.com
- Love Motorsport and Formula 1

- Used 3ds Max and Photoshop to create, edit characters, objects and environments for the game engine.
- Worked closely with programmers to develop efficient and flexible character rig, which included facial animation.
- Created, applied and edited looping character animations for all game characters.
- Worked on projects for high profile clients such as Siemens, IBM, Fiat, Unilever and PWC.
- Developed tools to rapidly speed up art asset importing as well as improve quality.
- Organised and managed over 2000 art assets in the Caspian library.
- Worked with development team to bring lightmapped environments to the game engine.
- Built a custom 3ds Max material editor to speed up working with game engine materials.

G-unleashed.com – Co Founder, Developer

2004 – 2005

- Built popular Grand Theft Auto websites, GTA3 Unleashed, Vice city Unleashed and G-Unleashed.
- Recognised by Rockstar Games as a top fan website for GTA gaming.
- Achieved ranking in the top 50,000 most active websites according to alexa rankings.
- Achieved No. 1 search ranking for “GTA Vice City hidden packages guide” on google.
